

Safer core, safer film.

Food&Pharma core® is the PVC core designed, developed and produced by Laborplast to meet the increasing requirements on safety, quality and performances of those companies that produce flexible packaging intended for the foodstuffs and the pharmaceutical sectors.

Food&Pharma core®. This product comes from the collaboration in terms of studies and analysis between Laborplast experts' team and specialised laboratories. It is to point out that this core **comply**, according to the current legislation*, with the application on the before mentioned companies that produce flexible packaging intended for the foodstuffs and the pharmaceutical sectors.

The eco-sustainability has always been one of the main concerns for Laborplast. The increasing importance assigned to it has assumed an essential role on the development of this core.

Since **Food&Pharma core®** has been conceived paying close attention to the LCA (Life Cycle Assessment) it is actually a 100% recyclable product.

The standard product is available in white. Different personalized colours can be supplied on request.
